思考

现在有哪些Human Computation应用？

Human Computation产生需要什么基础？

- 现在依然存在许多人工智能难题
 - * 人很容易解决
 - * 但是复杂的计算机算法很难解决
- 常见的人工智能难题
 - * 感知（目标识别、分类）
 - * 自然语言分析（观点分析、翻译）
 - * 认知（计划、推理）

Human Computation

OCR难题

The Breckinridge and Lane Democrats, having taken courage at the recent eastern advices, are organizing energetically for the campaign. Several prominent Democrats who at first favored DOUGLAS, are coming out for the other side, apparently under the pressure of Federal influence. An address to the National Democracy of California, urging the party to support BRECKINRIDGE, has recently been published, which manifestly has strengthened that side of the question. It is signed by 65 Democrats, many of whom occupy respectable and prominent positions in the party, 22 of them are Federal office-holders, eight more are recipients of Federal patronage, and the others represent a mass of politicians giving the document most weight. The Douglas Democrats are also active. The Irish and German vote will mostly go with that branch of the party, but it is difficult to estimate which wing is the stronger. Thus far 17 Democratic newspapers have declared for DOUGLAS, 13 for BRECKINRIDGE, and 9 remain non-committal, with even chances of going either way. Under these circumstances the Republicans entertain not unjustifiable hopes that the Democratic divisions may be so equally balanced as to give the State to LINCOLN. Some very respectable Bell and Everett meetings have been held in different parts of the State, but thus far that party does not exhibit much rank and file strength.

The New-York State Yacht Squadron, on its annual cruise to Newport, came into the harbor yesterday afternoon. The following are the names of the boats that came to anchor here: *Jessie*, *Geraldine*, *Evelyn*, *Annie*, *Manning*, *Julia*, *Bonita*, *Magie*, *Widgeon*, *Rambler*, *Fleur-de-Lis*, *Henrietta*, *Sea-Drift* and *Maria*, with the steamer *America* as a tender. On anchoring, each boat fired a gun, according to custom. The reports were heard distinctly in the city, causing considerable inquiry as to "what was up," and quite a number of sanguine individuals came into our office to inquire if the guns were not annunciations signals of the successful laying of the Atlantic Cable. We invariably replied in the negative. The squadron will leave to-day for Newport. The yachts *Washington* and *Rattler*, of this city, start with it, with parties of New-Haven people.

You aren't logged in so we can't record your results!

Welcome to Galaxy Zoo, where you can help astronomers explore the Universe

Galaxy Zoo: Hubble uses gorgeous imagery of hundreds of thousands of galaxies drawn from NASA's Hubble Space Telescope archive. To understand how these galaxies, and our own, formed we need your help to classify them according to their shapes — a task at which your brain is better than even the most advanced computer. If you're quick, you may even be the first person in history to see each of the galaxies you're asked to classify.

More than 250,000 people have taken part in Galaxy Zoo so far, producing a wealth of valuable data and sending telescopes on Earth and in space

Welcome to eBird

eBird is as birder does!

eBird News and Features

[eBirder of the Month -- Mary Gustafson](#)
November 12, 2011

The [Rio Grande Valley Birding Festival](#) is taking place this weekend, which means that our current November eBirder of the Month will be buzzing around Harlingen corralling teams of leaders, making sure field trips get off on time, and generally making sure that the 2011 festival comes off as another huge success. Sadly, all this means that Mary won't be getting out in the field as much as she would like. So it seems like an appropriate time to recognize her not only for her hard work as field trip chair for this festival, but also for her unflagging commitment to eBird, both as a user and a reviewer. Moreover, Mary has solidified the Rio Grande Valley Birding festival's commitment to eBird by ensuring that all field trip data are entered into the system, and that all festival participants become aware of the project. This adds up to hundreds of new eBirders each year thanks to this festival! Thanks Mary, and be sure to get out (e)Birding again when things settle down on Monday!

Amazon Mechanical Turk

The screenshot shows the homepage of the Amazon Mechanical Turk website. At the top, there's a browser header with tabs, back/forward buttons, and a URL bar showing <https://www.mturk.com/mturk/welcome>. Below the header is the Amazon Mechanical Turk logo and navigation tabs for 'Your Account' (selected), 'HITs', and 'Qualifications'. To the right, there's a link for existing users to sign in as a 'Worker' or 'Requester'. A blue banner at the top has links for 'Introduction', 'Dashboard', 'Status', and 'Account Settings'. The main content area features a yellow gradient background. It starts with a bold statement: 'Mechanical Turk is a marketplace for work.' followed by a subtext: 'We give businesses and developers access to an on-demand, scalable workforce. Workers select from thousands of tasks and work whenever it's convenient.' Below this is a red callout: '185,774 HITs available. [View them now.](#)'

Make Money by working on HITs

HITs - *Human Intelligence Tasks* - are individual tasks that you work on. [Find HITs now.](#)

道路监控

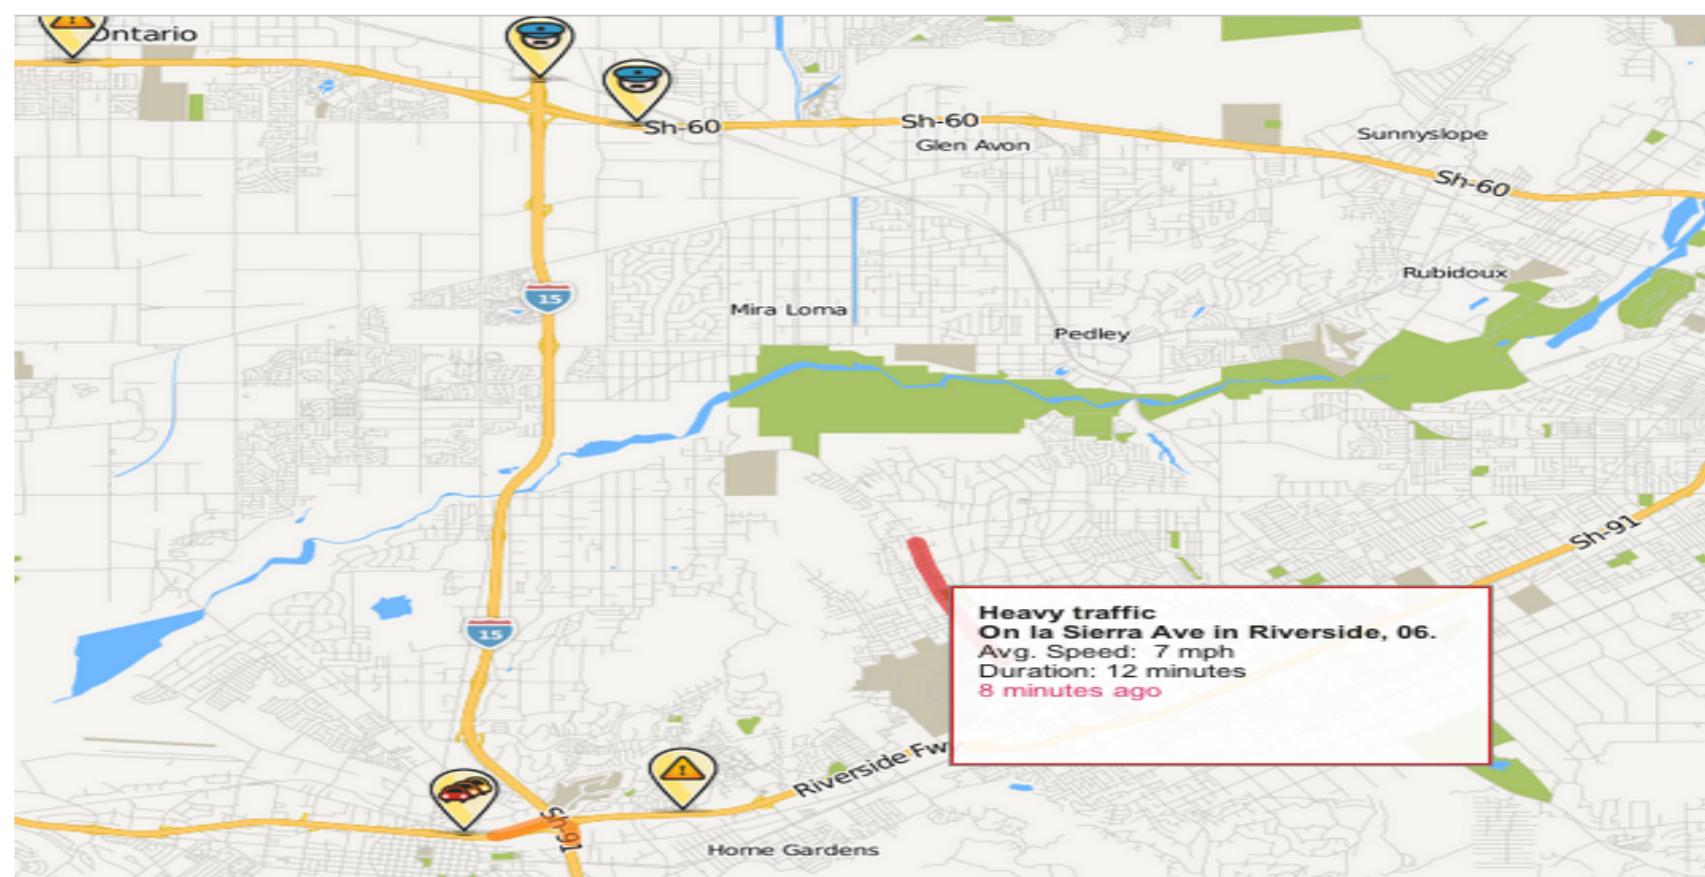

The image consists of two parts. On the left, a photograph shows a traffic camera mounted on a pole, providing a view of a multi-lane highway interchange with several cars in motion. In the background, a dense city skyline with numerous skyscrapers is visible under a clear sky. On the right, a screenshot of a traffic monitoring software interface for the NSW Roads & Traffic Authority. The interface features a map of Sydney, Australia, with various traffic routes highlighted in green and orange. Numerous black camera icons are placed along these routes, indicating the locations of live traffic cameras. The software includes a toolbar at the top with links like 'LOGI', 'COLLOQUIUM', 'MSDN', etc., and a sidebar on the right containing sections for 'My journey', 'Traffic hazards', 'Map options', 'Live conditions', 'Public transport', and 'Heavy vehicles'. The 'Traffic hazards' section is expanded, showing a list of incidents including 'Incidents (6)', 'Scheduled road work (116)', 'Major events (4)', 'Fire (0)', 'Flood (5)', and 'Alpine conditions (0)'. The 'Live conditions' section has checkboxes for 'Traffic flow (map key)' (checked), 'Live Traffic Cameras' (checked), and 'Variable Message Signs' (unchecked). The 'Public transport' section has checkboxes for 'Train stations' (unchecked) and 'Ferry wharves' (unchecked). The 'Heavy vehicles' section has checkboxes for 'Heavy vehicle checking stations' (unchecked), 'Heavy vehicle rest areas' (unchecked), and 'Safe-T-Cams' (unchecked). At the bottom of the interface, there are links for 'Privacy | Copyright | Terms | Sitemap' and '131700 Report a traffic incident • 132701 RTA traffic information line • © Roads and Traffic Authority (NSW) 2010. All rights reserved.'

<http://www.captcha.net/>

<http://en.wikipedia.org/wiki/CAPTCHA>

CAPTCHA定义

- A program that generates and grades tests that are human solvable but beyond the capabilities of current computer programs
- 全自动区分计算机和人类的图灵测试
- 验证码，一种区分用户是计算机和人的公共全自动程序

CAPTCHA历史

- 1996, Moni Naor
- 1997年, AltaVista
- Yahoo邮件是第一个大规模采用CAPTCHA的网站
- 2000年, von Ahn和Blum设计出第一个抵御OCR的CAPTCHA
- 2007年, reCAPTCHA
- 2007年, NoCAPTCHA
-

HIPs:

Human Interactive Proof

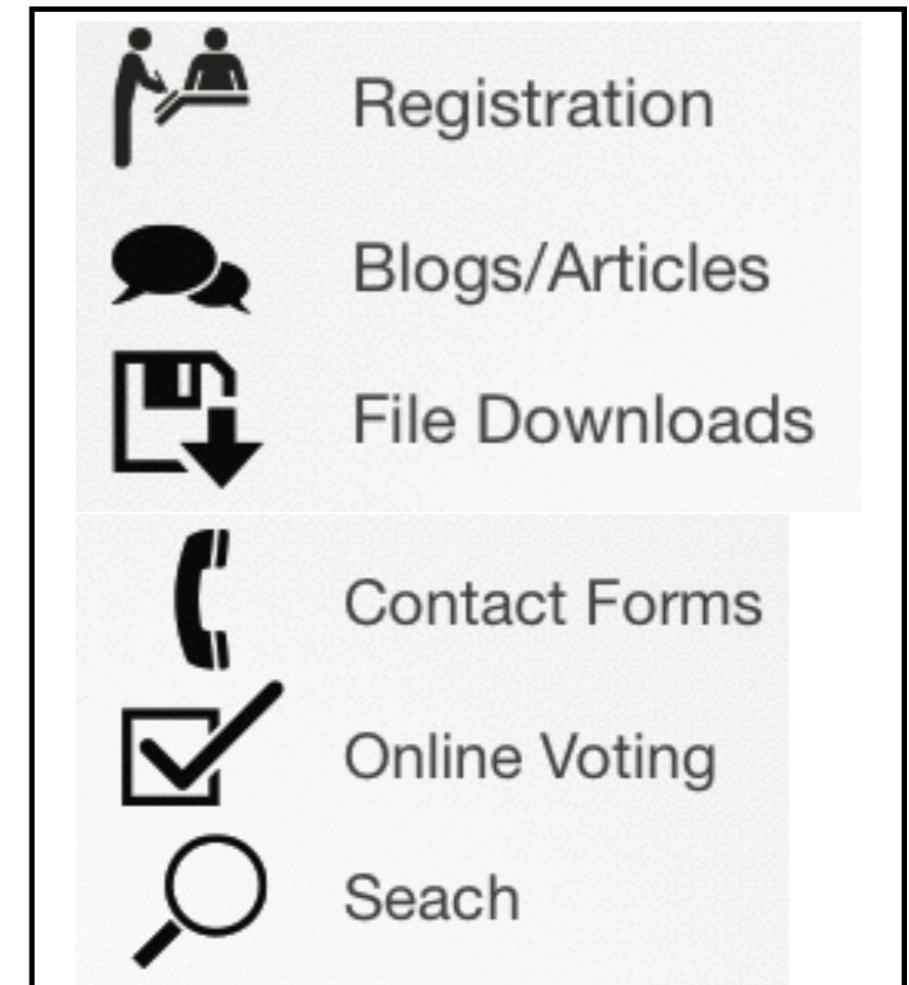

OCR:

Opitcal Character Recognition

CAPTCHA应用

- 判断人还是机器
 - * 保护网站用户注册， 提供免费服务给用户而不是bots
 - * 保护搜索引擎， 防止评论spam
 - * 确保在线调查更可信， 防止虚假投票
 - * 防止spam制作者很容易的获得email地址
 - * 防止针对口令系统的字典攻击
 - * 抵御bots
